

Automatic recognition of bavarian dialects

Bachelor Thesis or Master Project

We search for a student that is interested in working with speech samples from different regions of bavaria (www.dialekte.schule.bayern.de/sprachatlas/) and train a classification algorithm to automatically classify new samples. Also, a small web-application should be created as part of the project.

Necessary: Programming experience in python

Optional Experience:

Deep learning, web development, understanding bavarian

If you are interested write a mail with your CV, grade overview and a brief introduction of yourself to Annette.Schwarz@fau.de
